Travelling in Infinity
Jet black baby you and me
Worlds apart and miles and miles away
Closed the door on another day

Yesterday when I was your savior
Price Paid for bad behaviour
For stars everything can change
Futurism, On a diferent Plane

And my favorite thing is you
In the days of two
Take me high above the stars
And tonight is ours

Born again now a little older
Status one is so much colder
Kiss me like the Palermo sun
In my arms you're the only one

Hearts on fire I will always see
But without you I am only me
Smile again and I'm going under
One and one is another number

And my favorite thing is you
In the days of two
Take me high above the stars
And tonight is ours
