Caesar I wanna see ya, we scared of police not North  
Korea  
I sweat and bleed working' to feed mi familia  
Wear a jacket every day full metal, I'm from the ghetto  
Where teens forced to settle so they scream like a  
kettle  
Gang bang and exchange drugs they try to peddle  
Lost love from living' as thugs since they was little  
Go to the Sire tell him we bringing' his empire down  
When my Messiah returns he's gonna try ya  
Every liar will perish in lakes burning with fire  
Murdering thieves how much peace does money buy'ya  
Let's educate the homies cause the game has changed

Instead of wrists they making' sure our brains are  
chained  
Let's reminisce, how many of us hanged and slain  
And now we pimp our women as a claim to fame  
You're just a puppet  
Dumb Elmo playing with flames  
These are the last days and it's finna rain  
That's why they entertain us  
Everybody loves ya when you're famous  
Hating everybody else who ain't us  
All we want is more  
Overlooking poor people in anguish  
Dollars are the universal language  
I want to see Caesar
