

Angel Chix "Nothing To Fear"

Visit "[Nothing To Fear](#)" on MotoLyrics.com

If it comes too easy, then let it go
If you fall too hard, then let me know
And I'll be here, nothing to fear
If I'm pushing you, then pull away
If it's hurting you, then stop today
And I'll be here, nothing to fear

Wait right there, look around
Something just isn't right
It came too quick and too easy
No effort put into the fight

You've got to let it go

Before it swallows you whole

Chorus

I know this time it's hard
But you have to keep carrying on
If you look over your shoulder
You will see me singing my song

Chorus

My love for you is pure
Untainted, I've got your cure
I only do this just to help you through
And I only wish you'd do this for me too

Chorus
