Angel of death  
A faceless evil spirit that haunts  
Searching for the soul that he must take  
Steeds of white he rides through the realms of unknown  
He is just a messenger from hell  
Scanning the oceans searching for victims to taunt  
Looking for those who dare rise him from the grave

Angel of death  
Angel of death  
Angel of death  
Angel of death

Riding along he cannot find those that he seeks  
Yet he knows he is on the right trail  
Breaking the circle, not knowing of the danger she's in  
He takes her with him through stygian to hell  
To hell  
Scanning the oceans searching for victims to taunt  
Looking for those who dare rise him from the grave

Angel of death  
Angel of death  
Angel of death  
Angel of death

Suddenly I awake, looking 'round to see where I am  
Realise it's been just a crazy dream  
I open the door to find that he is waiting there  
The angel of death has come to take my soul  
My soul  
Scanning the oceans searching for victims to taunt  
Looking for those who dare rise him from the grave

Angel of death  
Angel of death  
Angel of death  
Angel of death
