Hello beloved  
I just called to say  
Hello hello beloved  
thinking of you in a special way  
Stayed by my side  
you've been a lover and a guide  
No other friend so dear  
You put trust where there was fear  
I could'nt face another day alone  
I need a love to call my own  
I just called to say  
Hello hello hello my beloved  
I thank god for you yes i do yeah  
Hello hello hello  
My beloved from a heart thats so true  
When i had no place to go  
You came and opened up your door  
You took the time to care  
when i was drowning in despair  
Nobody knows like you  
All the havoc i've been through  
Hello hello hello  
Hello hello my my my my beloved  
I just called to say  
Hello hello hello yeah well well well  
Theres no way to put a price on the special way you  
touched my life  
In the morning evening noon and night  
You made everything alright Hello Hello
