Come and take a ride
Across the universe with me
Because this place is bringing me down
We make a stop
On mars and watch the stars that shine a million miles
away from this town
But now

Come and take my hand
Close your eyes and let your mind take you away with
me right now
When I see you all my troubles they fade
I swear that you were made
Swear that you were made from the stars

As we slip away
Beyond the milky way now thinking we both could end
up about
And I will hold you close(hold you close)
We can make love Watch a millions suns come up
without the darkest of clouds
But nowwww

Come and take my hand
Close your eyes and let your mind take you away with
me right now
When I see you all my troubles they fade
I swear that you were made
Swear that you were made from the stars
Stars
The Stars
Swear you were made from the stars, the stars

So take my hand, close your eyes and let your mind
take you away with me
When I see you all my troubles they fade
I swear that you were made
I swear that you were made from the stars
Stars
The Stars
I swear you were made from the stars

Stars
The Stars
I swear you were made from the stars
