What happened to us we used to be so confident  
That things would be okay  
I never realised that something was wrong  
'Til a part of me had started to decay

Feel like a rocket without fuel  
I fail to breathe, escape velocity  
Come crashing down, sucked in by my whole world  
A fucking tragedy

Tonight, it's time to leave this town  
And get out of here  
It's too late to try and start again  
So get out of here

What happened to you  
You never replied to my letter  
I don't know if you're alive or dead  
Never forget those feelings  
It's like I am feeling it all again

You never really forget  
(x8)

Tonight it's time to leave this town  
And get out of here  
It's too late to try and start again  
So get out of here

Tonight, it's time to leave this town  
And get out of here  
It's too late to try and start again
