### "Somebody's Outside"

Visit "[Somebody's Outside](#)" on MotoLyrics.com

Haven't you noticed there is someone outside  
Looking through our window when we sleep at night  
You must not leave me alone anymore  
Awake all night worried for

You to be with somebody else  
Time to be with somebody else

Didn't I tell you about the dream I had last night  
We were both in it and everything seemed so right  
When I opened up my eyes you were standing beside  
our bed  
Don't remember the look on his face, but I remember  
I remember what he said

To be with somebody else  
It's time to be with somebody else  
For one to hold and for want you  
It's time for you to be with someone like me

Somebody touched me and whispered in my ear  
Come a little bit closer there's nothing for you to fear  
here  
So I left your side and followed my own voice now  
The window was open but he was gone  
And I went back to you

To be with somebody else  
It's time to be with somebody else  
For one to hold and for want you  
It's time for you to be with somebody outside
