[Verse #1]

Let me tell you something
One thing you oughta know
Impart a little wisdom
For anyone who cares to listen
You can take a number
Or sit this whole thing out
One beat behind another, brother
That's what this is all about

[Chorus]

Last stop, shake it off, shake it off
Gonna take that sinking feeling
Lose it, let it go, let it go
Keep up that jump-up rhythm
Turn it up, bring it down
There's all the more to go around
Just let that moment set you free, free, free, yeah

[Verse #2]

Let me show you one thing
Everything you need to know
Stay open to suggestion
Listen to a good thing mentioned
Your head can play the numbers
And you can work them out
Your heart is made for loving, darlin'
And that's what life is all about

[Chorus]

Last stop, shake it off, shake it off
Gonna take that sinking feeling
Lose it, let it go, let it go
Keep up that jump-up rhythm
Turn it up, bring it down
There's all the more to go around
Just let that moment set you free, free, free, yeah

[Bridge]

I've been wondering
Wondering so long
Why you seem to do it all so wrong

Now the day has come
For you to realise
I don't need no man that can't satisfy

[Verse #3]

You might be feeling something
Something I might control
Here's a piece of wisdom
Maybe this time you should listen
I control my life now
And I'm alright with that
So turn around and walk on out
That's what I am all about

[Instrumental]

[Chorus]

Last stop, shake it off, shake it off
Gonna take that sinking feeling
Lose it, let it go, let it go
Keep up that jump-up rhythm
Turn it up, bring it down
There's all the more to go around
Just let that moment set you free, free, free, yeah

Ooh---

[Outro]

(Free, free, free)
(Free, free, free)
Just let that moment set you free
(Free, free, free)
(Free, free, free)
(Free, free, free)
Alright
(Shake it off, shake it off)
