

Autopilot Off "Nothing Frequency"

Visit "[Nothing Frequency](#)" on MotoLyrics.com

There's static in the atmosphere
A constant interference that is killing me
I'm losing the connection here
When all the frequencies are down
And this silence seems so loud

That's why
This system, it shorted out
Programmed restraint before the shutting down
This system shorted out
Memory fails during the crashing down

And I'm screaming at the satellites
And I'm watching all the screens go black in front of me
I'm sending out a prayer tonight
'Cause all the frequencies are down
And this silence seems so loud

That's why
This system, it shorted out
Programmed restraint before the shutting down
This system shorted out
Memory fails during the crashing down

And as it's starting to fade out
And as we're heading underground
Well, there's a pessimistic side of me
That knows that this might never turn itself around

This system, it shorted out
Programmed restraint before the shutting down
This system shorted out
Memory fails during the crashing down

This system, it shorted out
Programmed restraint before the shutting down
This system shorted out
Memory fails during the crashing down
