The party started out so well
Never thought for the outside world
Seeping through the vanishing point
This beautiful snow makes angels

The closer you come the warmer it became
I feel the rush of a thousand tiny beats
Fill the heart at once

Can you feel the rush
A thousand beats fill the hearts at once
Feel the rush
A thousand hearts find a way out

I see doubt
Kiss the day goodbye
Give into the night
Everything is beautiful
Kiss the day goodbye

Trip across the time zones
Move through the interzone
Wash away the dead bones
Standing still can kill a boy

Can you feel the rush
A thousand beats fill the hearts at once
Feel the rush
A thousand hearts find a way out

I see doubt
Kiss the day goodbye
Give into the night
Everything is beautiful
Kiss the day goodbye

Kiss the day away
Give up everything that you shy to
Everything is beautiful
Kiss the day goodbye
