"Pus / Rot"

Your bowels are rotten
Your face is decaying
Your eyeballs have failed you
And so has your brain
And your rectum is bleeding
Your fingers are missing
Your skin has turned grey
In your veins disease is breeding

Cancerous innards
Bleeding liver
Rotten to the core
Shitting out your black intestines
life exists no more

[Lead:D.C]
Lying face up in your coffin
You're fucking dead
Never again
To spread around in rancid fucking stench

Placed six feet below the ground
Dirt shovelled in
left to rot
Maggots breed in your head
Slowly your face decomposes
