Invisible man, invisible man
Invisible man deat man... dying!

Let me be the martyr of this ceremony
Injected fear, infest tour reality
Crushing your stability to the ground
I am, I am everywhere... I'm all around

Just another victim, no warning ever given
Disciple under command, fight as an invisible...

Man from impure civilization
Building up a war to stop us from salvation
Watching your security tumbling down
I am, I am everywhere... I'm all around

Just another victim, no warning ever given
Disciple under command, fight as an invisible...

The sign shined so bright
That I since blindly follow
My hands to the sky
I'm the closen one to beat him hollow
I am contagious, you're not my friend
Pleading guilty for a crime against humanity
You shall diie!

Can you feel the rope... the rope around your neck
Ready to do anything... kill... kill to protect
Crushing your stability to the ground
I am, I am everywhere... without a sound

Just another victim, no warning ever given
Disciple under command, fight as an invisible...

Invisible mans, Invisible mans,
Invisible mans... dying for a god!
