There's one good thing about a bad thing I just found  
out today  
It's like they say about the good things give it time and  
it will go away

I had a girl who loved me what a good thing  
The best I guess that heaven had to send  
And when that woman left me all my friends said  
You know all good thing must come to an end

And now I've got a heartache what a bad thing  
It's a worst heartache the devil had to send  
But it can't last forever what a good thing you know  
It's a good thing that the bad things have to end  
There's one good thing...  
[ guitar + harmonica - steel ]  
There's one good thing...
