Brains in bits - Electrodes attached  
Crowded in pens - For eggs to hatch  
Rabbits don't cry - Mice don't fight  
Join the animals - In their plight

The answer is simple  
No we're not cripples  
You should care  
If you fucking dare

The liberators - Got good intentions  
But not through violence - Just break their sentence  
Peaceful means - Should be used  
To show disgust - At animals abused  
Free the creatures  
God's so called preachers  
Let them live  
Is that much to give?

Fux fur coats - And seal skin jackets  
Look better on animals - Than hanged old faggots  
And guts - Death & pain  
Needless killing - Cos they're so vain

Stop the culls  
More smashed skulls  
Just let them live  
Or is that much to give

Animal Welfare - Animal Welfare
