Aliens from another world  
They come to U.S. for jobs  
They open up their businesses  
We're outside looking in...

CH: What - is the reason for this  
Why - it should fail to exist  
When - will this fucking bullshit end?

The ones who pay, they stand in line  
Awaiting every check  
The measly wages they receive  
Don't even cover half of it

CH: What - Why - When

I cannot get a job because  
There's no place to work  
Oh my god, don't look to me  
I feel like such a jerk  
There's something going on  
And we're the last to know  
Perhaps we should just relocate...
