

## Antidote

### "How Can We Live Tomorrow"

Visit "[How Can We Live Tomorrow](#)" on MotoLyrics.com

The rich are getting richer

The poor are getting less

I don't see any changes

It's getting a big mess

How can we live tomorrow if there's no reason to live today

How can we live tomorrow if there's no reason anyway

People get divided

No longer in control

What's the point in living

If we have no say at all

Some people live in castles

While others starve to death

The gap is getting wider

This world is going mad
