ENGLISH TRANSLATION:

Every time i look at you
i want to tell you everything i've never said
how did i give in this brake-up?
Every time you look at me
you wake up the same storm in me.
My body seeks a port
and you..you are the reason..

REFRAIN:

But it can't be happening
for my heart to still remember
to ache, it can't be happening
They say that everything that hurts is left to time
and everything that changes, changes for good..
It can't be happening
I thought I was over you
but it can't be happening
every sign on my body refuses, doesn't go away
and it screams i love you every night..

Every time you look at me
you knock the same door in me.
I open in the dark, you are not here, again.
every time I look at you
my mind gets blind by the same lights
And love seeks a place to hide like mad..

REFRAIN:

But it can't be happening
for my heart to still remember
to ache, it can't be happening
They say that everything that hurts is left to time
and everything that changes, changes for good..
It can't be happening
I thought I was over you
but it can't be happening
every sign on my body refuses, doesn't go away
and it screams i love you every night
