Come on shine your light on me  
Come on shine your light on me

Don't make this complicated, come on  
You know why i'm here for you  
You've been hurt but we can make it  
We got nothing to lose, yeah, yeah

Come on shine your light, won't you shine your light  
Come on shine your light on me  
Come on shine your light, won't you shine your light  
Come on shine your light on me

Lets get back to the feeling  
Cause I, know we can share the dream  
Faith means i'm still believing  
And you know what i mean, yeah, yeah  
Come on shine your light, won't you shine your light  
Come on shine your light on me  
Come on shine your light, won't you shine your light  
Come on shine your light on me

Ohhh I never thought I'd find a love and feel this way  
No, no,  
No, no  
Ohhh forever means i'll never let you down no way  
Just stay...

Come on shine your light, won't you shine your light  
Come on shine your light on me  
Come on shine your light, won't you shine your light  
Come on shine your light on me
