Traffic noise, expensive toys
A love that never lasts
Broken homes and self-made thrones
We're livin' life too fast
That we forget the things that His love brings
Beyond what this world is
I can hear it still today
What the preacher used to say
This is how you live
You've got to..

Believe in your heart
Right down to your soul
And speak the true things
And know that you know
'Cause this might be the day
So live like it is
Find the good way
And walk in it
Walk on

Saints of old and streets of gold
Will gaze upon His throne
Singin' holy, holy
God of glory
We'll worship Him alone
So keep your eye on the sky
While it's all passing by
This world is not our home
'Cause someday soon
We're gonna be made new
You've got to...
But until then
Believe in your heart

Right down to your soul
And speak the true things
'Cause this might be the day
And know that you know
So live like it is
Find the good way

Walk on
And walk in it
Believe in your heart

Right down to your soul
And speak the true things
And know that you know
'Cause this might be the day
And walk in it
So live like it is
Find the good way
Walk on

Take a look around
Why can't we see
The world is falling down
That it's almost over
The clouds are rollin' in
The dead are gonna rise
He's gonna break the sky
Will fly, will fly

Those who are alive in Him
Find, find the good way
Find, find the good way
Find, find the good way
Right down to your soul

Believe in your heart
And speak the true things
And know that you know
'Cause this might be the day
So live like it is
Find the good way
And walk in it
Walk on

Believe in your heart
Right down to your soul
And speak the true things
'Cause this might be the day
And know that you know
Find the good way
So live like it is
And walk in it
Walk on
