Burn in towering columns of cremation  
Incinerate generations of disease exonerate and  
appease  
Rendered into ash the last son of mankind  
Absolved the legacy of men and judgment descends  
Blood boiled skinless and scorched  
Through immolation your species reward  
Chambers ablaze charring remains  
Exculpating the wicked their names  
Burn billowing inferno of iniquity  
Plumes of smokestacks eternal churning out cinders of  
the dead  
Astral light obstructed and pitched into darkness  
The embers of humanity remain in smoldering requiem  
Funeral furnace  
Dies irã; dies illa.  
Funeral furnace  
Solvat sã;clum in favilla  
Fornace funerea  
Quantus tremor est  
Futurus  
Fornace funerea  
Ut ex abyssus  
Censura ortus  
Terminus terrarum  
Terminus terrarum  
Terminus terrarum  
Terminus terrarum
