I am the lord of the earth  
Spitting thunder and fire  
Demons light the lanterns of sorrow  
And indulge my desires  
Tyrant who spans the abyss  
Sunder the apertures wide that resist  
I am the ancient spider  
Who weaves the atoms into stars  
I scrawl the planets in motions  
And describe their circuitous course  
Frame the carnal figure in my jaws  
Permeate the mantle at it's source  
Undeclared wisdom guide my hand  
And render the inheritance of wrath  
Open the mysteries of your creation  
Pantheon infernal move and appear  
Show favor unto me for I am the same  
Bender of light wielder of steel  
Zacar od zamran  
Odo zirn de qa'an  
Damploz coronzon inoas zorge  
Irdo lel noco orsba mahorela  
Blood of centuries  
Ignite the surface of mercury
