

## Apocalyptic Visions "Teeth"

Visit "[Teeth](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Black mouth inviting cold skin starkly white  
Pierced flesh decorations complete the illusion of life  
Trailing your innocence in the water gathering  
predators  
Fight me give me a memory  
Bite me kiss me with violence  
Virgin and whore slave and master  
Fuck by the numbers in lifeless passion  
Pierced flesh decorations complete the illusion of life  
Trailing your innocence in the water gathering  
predators  
Fight me give me a memory  
Bite me kiss me with violence  
It's over for you  
At this point no return  
In your gothic masquerade of affection  
You have summoned your end  
Bury my teeth in your neck  
Drain the blood rip the flesh  
Bind your wrists with my fists  
You will cease to resist
