### BORDERLINE

Unplug this Cathodic, from the way of the world  
We are, we are the happening  
We are the happening, we are the cause  
We are, we are the antidote  
We are, we are the cause  
What will become of us?  
Show me an un-apathetic world where we were told to  
wash our hands  
We would understand?  
Is someone hearing me right, why can't we open our  
eyes?  
How long must we become the very thing were running  
from  
Is someone hearing me right, why can't we open our  
eyes?  
And see what we've become; and see what we have  
done

Is someone hearing me right, why don't we just open  
our eyes?  
We are the end  
How long must we become the very thing were running  
from  
We are the end  
Is someone hearing me right, why can't we just open  
our eyes?  
We are the cause, we are the end  
We are the cause  
Is someone hearing me right, why can't we open our  
eyes?  
How long must we become the very thing were running  
from  
Is someone hearing me right, why can't we open our  
eyes?  
And see what we've become; and see what we have  
done
