Throw the weight of your life behind
Blindingly light conversation
Our very first beauty contest
On the edge of starvation

Film me finish me off: Film me
Film me finish me off: Finish me off

Some psychological palaver
Where you sit and claw
At the pages of another
Emotional brochure

Film me finish me off: Film me
Film me finish me off: Finish me off

Consecrated by perfect lighting
My blood spread out and danced
Then you came at me, again, again
Nasty and advanced

Film me finish me off: Film me
Film me finish me off: Finish me off

My blood just got in your switches
