"Still Around"

Visit "[Still Around](#)" on MotoLyrics.com

In this life of uncertainty
There are people that we all need
Someone to face you
With no disguise

In you there's a remedy
That makes everyday
Seem trouble free
No distance and no device

'Cos you hear the words
When no one understands

When my world has come undone
And I've lost my setting sun
When all I see are clouds
You're still around

When I fall into a tear
Inspirations disappear
You clear away that doubt
'Cos you're still, you're still around

Now I've stumbled on uncertainty
Never thought this could ever be
No contradictions
Left inside

When I feel the rain come my way
You give me sun, you're my brighter day
Intuition's telling me
To stay

'Cos you hold the words
When nothings left to say

When my world has come undone
And I've lost my setting sun
When all I see are clouds
You're still around

When I fall into a tear

Inspirations disappear
You clear away that doubt
'Cos you're still, you're still around

In this life of uncertainty
There are people that we all need
Someone to face you
With no disguise

In you there's a remedy
That makes everyday
Seem trouble free
No distance and no device

'Cos you hear the words
When no one understands

When my world has come undone
And I've lost my setting sun
When all I see are clouds
You're still around

When I fall into a tear
Inspirations disappear
You clear away that doubt
'Cos you're still, you're still

When my world has come undone
And I've lost my setting sun
When all I see are clouds
You're still around

When I fall into a tear
Inspirations disappear
You clear away that doubt
'Cos you're still, you're still around
