Ohh, oh, oh, oh  
Yeah  
Ohh, oh, oh, oh  
Ahh, ahh, ah

When the sun is up  
On the clear blue sky  
You will act like a lover

When the sky is gray  
And the rain comes down  
You will run for cover

Feel the heat  
Come out of cold  
And your arm is touching me

Good morning sunshine  
You're my only light  
Lyin' with me by my side  
You keep me warm all day  
Jus' stay with me

Good morning sunshine  
Be with me all day  
Jus' don't let the rain pass you by  
When it's cloudy or windy  
And the snowflakes arrive  
You somehow just make me  
Make me feel I'm alive

When you leave my field  
Then you light the stars  
Fadin' away in horizon

There's a million streets  
Leading off the night  
Waiting for sun to be risen

Feel the heat  
Come out of cold  
And your arm is touchin' me

Good morning sunshine  
You're my only light  
Lying with me by my side  
You keep me warm all day  
Just stay with me

Good morning sunshine  
Be with me all day  
Just don't let the rain pass you by  
When it's cloudy or windy  
And the snowflakes arrive  
You somehow just make me  
Make me feel I'm alive

Hold it right there  
Let me take a minute of your time  
To explain how I feel through these rhymes  
I do the best I can and believe me if I could  
I'll build you a paradise with these two hands  
The top of your skin make my body go numb  
I'm thinking to myself, if my dream come true  
Or is it 'cause you never  
Give me a chance to tell you how I feel?  
The moments we had were too precious to kill

Ho  
When it is cloudy or windy  
Please turn your face at me

Good morning sunshine  
You are my only light  
Lying with me by my side  
You keep me warm all day  
Just stay with me

Good morning sunshine  
Be with me all day  
Just don't let the rain pass you by  
When it's cloudy or windy  
And the snowflakes arrive  
You somehow just make me  
Make me feel I'm alive  
Ooo  
Make me feel I'm alive
