Take me to the ocean blue  
Let me dive right into  
Anything I'll ever capture  
You can wait up all night  
Waiting for wrong or right  
I always knew where I had you

You can lie on my waves  
You can sleep in my caves

Living on the edge of peace  
Knowing that water can freeze  
Do you still want me to open

Come on into my waves  
You can sleep in my caves  
Let me know that you will hold me  
Till the tides take my soul

We belong to the sea  
To the waves you and me  
Living in the ocean so blue  
We belong to the sea  
Open wide being free  
A minute everlasting with you

And as soon as it stops  
We'll all be a drop  
Coming down on your wide open sea

Can you wash me away  
Will you dry me one day  
Take me to the place where I came from  
If I had a open heart

Would you tear that apart  
Why do I feel that you're lonesome

Come on into my waves  
You can sleep in my caves  
Let me know that you will hold me  
Till the tides take my soul

We belong to the sea  
To the waves you and me  
Living in the ocean so blue  
We belong to the sea  
Open wide being free  
A minute everlasting with you

And as soon as it stops  
We'll all be a drop  
Coming down on your wide open sea

There's a thunder inside me  
That your silence will kill  
And I know that you forced me  
To get rid of what I feel

We belong to the sea  
To the waves you and me  
Living in the ocean so blue  
We belong to the sea  
Open wide being free  
A minute everlasting with you  
And as soon as it stops  
We'll all be a drop  
Coming down on your wide open sea
