She had a wiggle in her walk that I couldn't resist
Yeah and I can still feel the fire from her burning kiss
I had her for awhile hey and I did too
But she had other plans so she cut us both loose

Well she didn't want me she didn't want you
She threw us away like yesterday's news
You and me buddy's got a lot in common
We've been dumped by the same blame woman

Well I thought I had her wrapped up just like twine
I thought I did too till she came untied

I was her one and only and I was too
Now we're sittin' here lookin' like a couple of fools

Well she didn't want me...
[fiddle + guitar]
I never thought that we'd be here
Swappin' sob stories and cryin' in our beer
We used to be enemies but now we're friends
Cause we sympathize knowin' where the other one's
been

Well she didn't want me...
Yeah you and me buddy's got a lot in common
We've been dumped by the same blame woman
