They observe our emotions as if they could absorb  
them and use them as their own  
They're feeding on our fears, pushing us into tears

We are deviated from the human potential  
A world for terror occurs frequently, connected with  
error

What they are attempting is so absurd  
The way to a man's beliefs is through absurdity

They can't succeed, but they are driven to it anyway  
Struck with delusional beliefs about divinity, the way to  
a man's beliefs is through absurdity

They get their way with us, because we have betrayed  
our own capacities  
Ignorant and perverted rulers that were thought to  
imprison all our souls
