The jury is out on my belief in destiny
And fates up next in this argument Im having with
myself
Did you want to talk about something else?
Because I lost my faith in everything I was brought up
thinking
To me, lifes all about the way in which you live it
And what you survive
Ive been trying to open up my eyes
I wont stop believing in love
And I'll hope that tomorrow always comes
But if this is the end, lets do it up right
Because it's all about the way we go out tonight
Im tired of feeling like Im doing something wrong
When all weve done is wait here quiet for so long
But Im not afraid
Just give me the rest of today
I wont stop believing in love
And I'll hope that tomorrow always comes
But if this is the end, lets do it up right
Because it's all about the way we go out tonight
I think Heaven is the way that you're remembered
And hells the way they curse your name up through
forever
So give me something to miss
Just in case there's nothing bigger than this
(Are we bigger than this?)
I wont stop believing in love
And I'll hope that tomorrow always comes
But if this is the end, lets do it up right
Because it's all about the way we go out tonight
