

## Arthemis "Mechanical Plague"

Visit "[Mechanical Plague](#)" on MotoLyrics.com

Scream words of justice  
You can scream words of pain  
In the cyber-world we're livin'  
It doesn't matter anyway  
Violent technologies  
Are knockin' at your door  
It's a fight against humanity  
A fight against the world  
Brainwash, cyber-sex  
It's a mechanical plague  
Brainwash, cyber-sex  
It's gonna drive me insane  
They sell you what they want  
Comin' through the night  
Tell them what you need  
And feel alright  
You're just another victim  
Of the things we'll never learn  
Running through the mountains  
You can hide in the deep blue sea  
Take a look all around you  
Be a cyborg just like me  
No more love and passions  
They will give you eternal life  
Don't you think you are invincible  
And drink their sea of lies
