A blazing fire in the skies
Like millions of bright fire flies
So many lives incinerated
German dreams obliterated

It could have happened anywhere
But it was in the USA
A little spark there no rescue
They all did burn and that is true

Hindenburg- in foreign lands
Hindenburg- a fire dance
Hindenburg- you're going down
Hindenburg- yes, you went down

What have we learned from this mistake
You all will burn, lifelines will break
Infernal fires from the fields
Is all you get in foreign air

I see it now it's all so clear
You fly away, you have no fear
You try to run, you try to hide
Irrelevant, you're bound to die!

Hindenburg...
