Frost on the port hole  
It doesn't look so angry after all  
We're low on water  
It was a one-way mission after all

Gretchen my captain  
So strong I never noticed your blue eyes  
Never looks hungry  
I guess I shouldn't have been so surprised

What your mother say to that?  
If she found out about your friends  
What your father think?  
If he knew you and I have before and will again

I find it painful  
To see your face and finally know that I  
Don't have what you need  
I never will, not even up so high

Six months till we die  
You love me, yes, I know and so do I  
Red rock, like concrete  
Can swing into my side and change your mind  
You know it can but

What your mother say to that?  
If she found out about your friends  
What would your father think?  
If he knew you and I have before and will again

What your mother say to that? Would your mom say  
If she found out about your friends, about your friends  
What your father think?  
If he knew you and I have before and will again
