{Intro}

A star lit sky
The moon held high
Your footsteps trace the hill
While the night stands still
Where did you go?
When will we know?
This moment feels like forever
Yet it will not last
As time draws near
Your plan unfolds
What will my life behold?

Affliction, your pain
Your blood she'd for my name
Salvation is near
The choice is all to clear
Redemption is close
It's what I strive for most
So faithful I'll be
To save each tragedy

I will not end like this (Like this)
I will not end like this (Like this)

We nailed you up, you forgave
You cried blood but you stayed brave
You died for us and it's true
That I'd to the same for you
We nailed you up, you forgave
You cried blood but you stayed brave
You died for us and it's true
That I'd to the same for you

Affliction, your pain
Your blood she'd for my name
So faithful I'll be
To save each tragedy
