with your lips a breath away from mine
I've never felt so romantic
I read the catch line at least three times
why the fuck won't you kiss me?!
there's an error in this script
there's a wrench in our plans
I'm so close I can taste you and I can't turn back
this isn't the last season
we'll have our time
because in my mind we were always meant to be
shut the cameras off
call this a publicity stunt
put it in the front page
I just fell in love with you
