Visit "[Win Us Over](#)" on MotoLyrics.com

Didn't think you'd ever get so far
It was down in georgia in the back of your car
Did they ever get a name
You left him dead in the rain
You had a crooked smile
Im sorry i helped with the miles

Couldn't find you in the pain and scene
Where the wild things roam and the air is clean
But those ruthless angels kept tracking your soul
To a golden sky down in mexico

Justified it isn't what i want
I used to stop your eyes
Make you take what i want
Did u ever do the same
And fall in love with the pain

You know i never tried
I got to hooked off the high

Couldn't find me in the pain and scene
Where the wild things roam and the air is clean
But those ruthless angels kept tracking my soul
To a golden sky down in mexico

You gotta win us over x2

Couldn't find us in the pain and scene
Where the wild things roam and the air is clean
But those ruthless angels they kept tracking our soul's
To a golden sky down in mexico

You gotta win us over x2
