"Solace"

Visit "[Solace](#)" on MotoLyrics.com

Yeah I find solace in your eyes
Can't face the silence from your side
The sky is starless, ease the darkness
Through the night till the morning light

I will glorify your name
I will watch over your flame
I will keep on the track of my aim
This I'll undertake
For I'm suddenly awake
There's no way back

Yeah I find solace in your eyes
Can't face the silence from your side
The sky is starless, ease the darkness
Through the night till the morning light

I was lost and I was found
Was a shadow under ground
Never knew where I was found
Until you came around

Tender is the night
As you sing a lullaby
To the darkness

Yeah I find solace in your eyes
Can't face the silence from your side
The sky is starless, ease the darkness
Through the night till the morning light
I find solace in your eyes
Can't face the silence from your side
The sky is starless, ease the darkness
Through the night till morning light.
