Where is our love going

There's a star in the night sky
Brings you to my side
Despite all the earth we feel
There's still glitter in your eyes

There's a chill in the night
It brings us closer together
Looking up without knowing
Where is our love going

Future is a sea of light
Future is a mass of shade
Dreams that you soon forget
Dreams where the TV made

There's a star in the night sky
Brings you closer to my side
Looking up without knowing
Where is our love going
There's a chill in the night
It brings us closer together
Looking up without knowing
Where is our love going

There's a chill in the night
Bringing all us together
Looking up without knowing
Where is our love going

There's a star in the night sky
Brings you closer to my side
Looking up without knowing
Where is our love going

There's a chill in the night
It brings us closer together
Looking up without knowing
Where is our love going
