Uh, uh when you hear it knockin' like that  
Y'all know what this is

When my man leave the house  
I know he's coming right back  
I got that good good  
I got that good good

No matter how much he might try to act  
He know just where it's at  
I got that good good  
I got that good good

I put it on him right, I do it every night  
I leave him sittin', mouth open like  
So I don't worry 'bout, nobody takin' my  
'Cause I know just the right thang to do  
I got that good good

I ain't never had a problem keepin' one  
Never been worried about him ever cheating on me  
'Cause when I say I got that pop lock and drop it,  
believe me  
If I'm with you it's gonna kill you on the days you don't  
see me

See the things I possess a lot of women don't  
And the things I'mma do for my, most won't  
I hear him talking 'bout it when I'm up in the salon  
Crying 'cause their man ain't come home  
I try to tell 'em

When my man leave the house  
I know he's coming right back  
I got that good good  
I got that good good

No matter how much he might try to act  
He know just where it's at  
I got that good good  
I got that good good

I put it on him right, I do it every night  
I leave him sittin', mouth open like  
So I don't worry 'bout, nobody takin' my  
'Cause I know just the right thang to do  
I got that good good

Ladies don't believe half what you hear  
'Cause it's all a waste of time  
If you know you got that good good good  
Everything will be just fine

So let your man be the man when he in public  
Even though behind the scenes y'all be runnin'  
Let him run with his boys, let him play his little games  
Let him drive his Cadillac, don't worry he'll be back

When my man leave the house  
I know he's coming right back  
I got that good good  
I got that good good

No matter how much he might try to act  
He know just where it's at  
I got that good good  
I got that good good

I put it on him right, I do it every night  
I leave him sittin', mouth open like  
So I don't worry 'bout, nobody takin' my  
'Cause I know just the right thang to do  
I got that good good

If you got that good good  
And you know it ladies show 'em where it's at?  
(Right here)  
Where it's at  
(Right here)

If you got that good good  
And you know it ladies show 'em where it's at  
(Right here)  
Where it's at  
(Right here)

See I don't know what them other girls be doing  
They be crying 'bout they man 'cause they always  
losing  
You need that  
(Good good)  
Gotta have that  
(Good good)

To keep 'em  
(Good good)  
They need that  
(Good good)

When my man leave the house  
I know he's coming right back  
I got that good good  
I got that good good

No matter how much he might try to act  
He know just where it's at  
I got that good good  
I got that good good

I put it on him right, I do it every night  
I leave him sittin', mouth open like  
So I don't worry 'bout, nobody takin' my  
'Cause I know just the right thang to do  
I got that good good

When my man leave the house  
I know he's coming right back  
I got that good good  
I got that good good

No matter how much he might try to act  
He know just where it's at  
I got that good good  
I got that good good

I put it on him right, I do it every night  
I leave him sittin', mouth open like 'woo!'  
So I don't worry 'bout, nobody takin' my  
'Cause I know just the right thang to do  
I got that good good
