Never too far away
I would take my heart right out of my chest
And place it in the palm of your hand
Just to show you how much I need you to keep
breathing
How I walk a million miles barefoot
To hold your hand
And these bloody feet of mine will keep bleeding

Chorus:
And I will let nothing keep me away
And I will let nothing keep me from you babe
Ooh
Away x5
Never to walk away
Never too far away

I will crawl all the plates of hell
And cross the devil himself
Just to be by your side
For you I will

I would run across the bareness
And hunt the stars to hold you
And if the world were to end today
I would still find a way

Chorus:
And I will let nothing keep me away
And I will let nothing keep me from you babe
Ooh
Away x5
Never to walk away
Never too far away

I would take three planes and a spaceship just to meet
you babe
And I would sail across the land
Just so I could see your face

Chorus:
And I will let nothing keep me away

And I will let nothing keep me from you babe
Ooh
Away x5
Never to walk away
Never too far away

Never too far away, away, away
Never too, never too, never too far away x3

And I will let nothing keep me away
And I will let nothing keep me from you babe
Ooh
Away x5
Never to walk away
Never too far away

And never too far from you baby
And I love you, I love you,
I want, i want you here with me

Said I would go anywhere
I would go anyplace
And never too far away
And never too far x3
Away from you
And never too far
