Baby, what you're going through
Know that I'm here for you
You don't ever have to worry 'bout it
'Cause everything else, I'll do without it

I'll share your struggle
(I'll place)
No one above ya
(In case)
You didn't know how strong my love is, baby
Let me show you

My love is true for only you, my dear
(And I wanna show you)
How much I care, I'll be right there always
(Yeah yeah)
(I'm gonna be right there)

How good love is, I pray for this to come
(Let me just show you)
You are the only one
(Only one)
The only one for me, yeah
(Only one for me)

Doesn't matter what they think of me
They're nowhere in your league
But everybody got a lot to say and
Doesn't matter, I don't look their way and

I'll always be the same and
This here will never change and
And if you still can't tell how much I love you
Let me show you

My love is true for only you, my dear
(And I wanna show you)
How much I care, I'll be right there always
(Oh, oh yeah)

How good love is, I pray for this to come
(How good love is and let me just show you)

You are the only one
(Only one)
The only one for me
(Only one for me)

I'm here, I'm gonna show you everything that I mean
You know you've always given me whatever I need
I've found somebody finally that's perfect for me
And I wanna show you, baby

I'm here, I'm gonna show you everything that I mean
You know you've always given me whatever I need
I've found somebody finally that's perfect for me
And I wanna show you, baby

My love is true for only you, my dear
(My love, it's all for you, my dear)
How much I care, I'll be right there always
(How much, ooh, yeah yeah)

How good love is, I pray for this to come
(How good love is)
(And you are the only one)
You are the only one
(And you are the only one, yeah yeah)
The only one for me, yeah

My love is true for only you, my dear
(My love)
(And I wanna show you)
How much I care, I'll be right there always
(Tell me [Incomprehensible] you)

How good love is, I pray for this to come
You are the only one
(Only one)
The only one for me
(The only one for me, yeah)
