Verse 1

=====

They say its a cold world

Yeah you got that right

I almost packed it all in on the spot last night

They want a killer instinct

Im just that type

If the fights not mine

I wont fight that fight

Life without struggling

Yeah right

Make one mistake, wont make that twice

Out of sight out of mine

Find yourself out of time

Buy your own pants

Get your hands out of mine

In the advance in a promise they say youll make it

Theres work to be done

You must grind and shine

If every second is a blessing

Yes it is precious

Suggest you get all instant message

The agresion when your finding a direction

Heading non stop just to find that the road is blocked

You wanna Pop, POP

Flip you and stun

Lets settle down and work it out  
Its really all you've got
