Alive

The only time when we will die
We never shed a tear to cry
Poisoned by these ghastly lies
They spread like radio
In the sky
Sending every day and night

Some other time
A new disease
Another conflict in our mind

The whole world is out of control
It all points to ground zero
The end of the world seems so near
In the ballade of fear

The worst is yet to come
The terror makes us numb

Were standing side by side
As our world collides

Shocking news all day
Who's gonna find a way out

Were standing side by side
As our world collides

Fear

The only sound that we can hear
Are the drops of falling tears?
The utopia to be free
Is our destiny

What will become
When we will still stay this numb

Some other time...
