Whoa, whoa, whoa
(And some of you better steal mine)
Whoa, whoa, whoa
(And some of you better steal mine)

[Verse 1]
Am I the reason why
You toss and turn last night ?
Everything was such a lie
It didn't come out right
All of a sudden it's cold and I'm falling apart
No, this can't be
Please don't leave me alone in the dark

[Chorus]
And I guess we're really over,
But come over, I'm not over it
And I guess we're really over,
So come over, I'm not over it
Late at night you made me feel like I'm desperate
I'm not desperate
A little bit possessive
Little miss obsessive
Can't get over it

Whoa, whoa, whoa
(And some of you better steal mine)
Whoa, whoa, whoa
(And some of you better steal mine)

[Verse 2]
I've never been a fan of long goodbyes
I'm at the finish line
And you're just way too far behind
In the morning I got and I fight with myself
I got the bruises to prove it
Then I swallowed your words
And spit them right back out

[Chorus]
And I guess we're really over, (over)
But come over, I'm not over it

And I guess we're really over, (over)
So come over, I'm not over it (over it)
Late at night you made me feel like I'm desperate
I'm not desperate, oh
A little bit possessive
Little miss obsessive
Can't get over it now

[Bridge]
It's like a fairy tale
Without a happy ending (happy ending)
But then again
Maybe we are just pretending
Why does it have to be so unfair?
Tell me that you care

And I guess we're really over,
But come over, I'm not over it
And I guess we're really over,
So come over, I'm not over it

[Outro]
Oh
Whoa, whoa, whoa
Little miss, a little miss,
Little miss obsessive
Little miss, a little miss,
Little miss, a little miss
Little miss obsessive

Last night you made me feel like I'm desperate
I'm not desperate, oh
A little bit possessive
Little miss obsessive
Can't get over it now

Whoa, whoa, whoa
(And some of you better steal mine)
Whoa, whoa, whoa
(And some of you better steal mine)
