I never thought I could feel this way
I never thought love could be true
For someone so independent, then along came, along
came you

Chorus

And in the evening, I lay me down, I lay me down, I lay
me down
And in the morning, I lay me down, by your side,
And in the evening, I lay me down, I lay me down, I lay
me down
My days my nights my life, they start and end with you

You are my sun, my moon my stars
Forever yours forever free
Together as one, the world is ours
You are my destiny

Chorus

And in the evening, I lay me down, I lay me down, I lay
me down
And in the morning, I lay me down, by your side,
And in the evening, I lay me down, I lay me down, I lay
me down
My days my nights my life, they start and end with you

Chorus out
