Don't wanna ever be alone
I guess that's how life goes
I need a soulmate now
Someone to show me how
How it feels to be loved
Without ever getting enough

[Chorus]
But now I have no one
No one to hold
Because you just left me
Out in the cold
Somebody must know
Just how it feels
To be all alone
With no one

Here I am again
Same place as last week
Only it is lonely me
You're not here no more
Please come through my door
Let's walk along the shore

[Chorus]

Nobody truly knows what lonely's like
Until no one holds them at night
Nobody is hurt until they fall
Or stumble even in the slight
Or when they have no one
No one at all

[Chorus x2]
