In this world where we live
There are times we must give
So that we in return can receive

Save the day, take a blame
Make the world see the fame
And the gain in lending a helping hand

Why not open your heart and listen
To the cry of someone in pain
Why not share your joy with someone who's in need

Cus when we are one
There's nothing we can't achieve
We can turn around unhappy moments
With a pretty smile
Hand in hand
All our dreams are coming true
The world will be a better place
When we stand together

Make a change in a place
In a way that you can face
When we change good tidings can be traced

In the dreams that we share
There is joy when we care
When we bring back smiles to all around us

Why not open your heart and listen
To the cry of someone in pain
Why not share your joy with someone who's in need

Cus when we are one
There's nothing we can't achieve
We can turn around unhappy moments
With a pretty smile
Hand in hand
All our dreams are coming true
The world will be a better place
When we stand together

In everything that we try
We won't make others cry
Cus we know that when there's joy
Life is bright and fair

When we stand together as one
We can climb every hill
We can face every storm

Close your eyes dream along
When you wake you'll be stong
Cus I will be lying next to you

Cus when we are one
There's nothing we can't achieve
We can turn around unhappy moments
With a pretty smile
Hand in hand
All our dreams are coming true
The world will be a better place

Cus when we are one
There's nothing we can't achieve
We can turn around unhappy moments
With a pretty smile
Hand in hand
All our dreams are coming true
The world will be a better place
When we stand together
When we stand together
