[D. Cardoen - Y. Cluckers]

I never thought that things of life would come this far  
you know

You cannot think about the future, gotta face it so  
Chemical dependency becomes like slavery  
Grim technology grows and it will bring you to your  
knees

We now live in a world made of corruption and greed  
Where things are easy to obtain for those who do not  
need

Mankind is the only real menace in this world  
I dare not look, I dare not hear this shriek of agony

Watch out for this slice of death  
Oceans die and forests burn  
Environment destroyed by neglect  
Greenhouse gasses fill the air  
Watch out for this slice of death  
Toxic wastes destroyed by need  
Environment destroyed by neglect  
Slice of death

The flood of acid rain burns the forests that remain  
'Till we can breathe no more, life is not only a game  
Pollution rates from nowadays are shooting up so fast  
So it will continue until nothing more can last  
We share responsibility for all that we have done  
But isn't it too late now to save mankind from mankind  
?

Deadly mess of human corpses laying all around  
(I) dare not look, I dare not hear this shriek of agony

Watch out for this slice of death  
Oceans die and forests burn  
Environment destroyed by neglect  
Greenhouse gasses fill the air  
Watch out for this slice of death  
Toxic wastes destroyed by need  
Environment destroyed by neglect  
Slice of death

Fear, thus we will disrupt the world  
Creating shortage all around us  
So real, beginning of the end  
Accounting for what happens all around us

I never thought that things of life would come this far  
you know  
You cannot think about the future, gotta face it so  
Chemical dependency becomes like slavery  
Grim technology grows and it will bring you to your  
knees  
We now live in a world made of corruption and greed  
Where things are easy to obtain for those who do not  
need  
Mankind is the only real menace in this world  
I dare not look, I dare not hear this shriek of agony

Watch out for this slice of death  
Oceans die and forests burn  
Environment destroyed by neglect  
Greenhouse gasses fill the air  
Watch out for this slice of death  
Toxic wastes destroyed by need  
Environment destroyed by neglect  
Slice of death
