As your eyes are closed
Reaching out to see
Sleeps hidden deep inside
Two (energetic) personalities

So many years unknown
Perfect it wants to be
Hypnotised intentions
Await - to be set free

Feels like a journey to my mind
In search your spirits left behind
Flashbacks the level of confusions
I explored the keeper of illusions

We are the lowest forms of life
In unknowledge we're still unite
We live beyond - we want to be
Like trapped (existence) in endless surreality

I am two entities - I am separated tuned
But still one character - like lateral ergonomic organic
marooned

As my eyes are open
The system we won't to see
Subconscious down
The level of my energy

Feels like a journey to my mind
In search of spirits left behind
Flashbacks the level of confusions
I explored the the keeper of illusions

We are the lowest forms of life
In unknowledge we're still unite
We live beyond - we want to be
Like trapped (existence) in endless surreality
